

Sink KE Copper

Kitchen Sinks

Code: 2156 858

DETAILS

Coloring	Copper
----------	--------

Edge/Installation Type	Undermount
------------------------	------------

Finish	PVD
--------	-----

Material	AISI 304 stainless steel
----------	--------------------------

Texture	Foster brushed
---------	----------------

Base	45 cm
------	-------

Dimensions	440x440 mm
------------	------------

Standard fittings	Fixing hooks, gasket, drain, overflow and siphon, boxed packing
-------------------	-----------------------------------------------------------------

Mixer holes	No standard holes
-------------	-------------------

Built-in hole	View technical data sheet
---------------	-------------------------------------------

Drainer	No
---------	----

Width	44 cm
-------	-------

Bowl dimension	400 x 400 mm
----------------	--------------

Number of bowls	1 bowl
-----------------	--------

Waste fitting	3,5" drain
---------------	------------

FEATURES

Basket 3,5" waste fitting	The drain is equipped with a large 3.5" drain, with the practical basket cap that prevents the discharge of solid parts.
---------------------------	--------------------------------------------------------------------------------------------------------------------------

Copper	The Copper finish is obtained by treating steel with a physical process called PVD (Physical Vacuum Deposition) which deposits particles of noble metals on the surface. The result is a unique and refined aesthetic effect, and an improvement of the mechanical properties of the steel which is more resistant to impact and scratches.
--------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

High thickness	1mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.
----------------	---------------------------------------------------------------------------------------------------

Perimetral overflow	The overflow is always a security on the Foster sinks that prevents the overflow of water in case of oversights. The perimeter drain solution improves aesthetics thanks to its square and essential shape.
---------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Small radius	Bowls with squared shapes with a modern design and an increased capacity, for a minimal aesthetics connected with an extreme practicality.
--------------	--------------------------------------------------------------------------------------------------------------------------------------------
