## FEATURES

Basket 3,5" waste fitting

The drain is equipped with a large 3.5" drain, with the practical basket cap that prevents the discharge of solid parts.

Deep bowls

This bowls reach an important depth, over 20 cm, thanks to the advanced production technology, that can be offer great capieny and practicity in all the washing operations.

Gold

The Gold finish is obtained by treating the steel with a physical process called PVD (Physical Vacuum Deposition) which deposits particles of noble metals on the surface. The result is a unique and refined aesthetic effect, and an improvement in the mechanical properties of the steel that is more resistant to shocks and scratches.

High thickness

1mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.

Perimetral overflow

The overflow is always a security on the Foster sinks that prevents the overflow of water in case of oversights. The perimeter drain solution improves aesthetics thanks to its square and essential shape.

Small radius

Bowls with squared shapes with a modern design and an increased capacity, for a minimal aesthetics connected with an extreme practicity.
