

Sink Skin 800 Gun Metal Undermount

Kitchen Sinks

Code: 4458 846

DETAILS

Coloring Gun Metal

Edge/Installation Type Undermount

Finish PVD

Material AISI 304 stainless steel

Texture Foster brushed

Base 90 cm

Dimensions 840x440 mm

Standard fittings Fixing hooks, gasket, drain, overflow and siphon, boxed packing

Mixer holes No standard holes

Built-in hole [View technical data sheet](#)

Drainer No

Width 84 cm

Bowl dimension 800x400mm

Number of bowls 1 bowl

Waste fitting Drain SPACE 3,5"

Notes: As the product consists of a single seamless steel surface with no gaps or interstices, the use of garbage disposal and waste fitting with automatic control is not permitted.

FEATURES

Gun Metal The Gun Metal finish is obtained by treating steel with a physical process called PVD (Physical Vacuum Deposition) which deposits particles of noble metals on the surface. The result is a unique and refined aesthetic effect, and an improvement of the mechanical properties of the steel which is more resistant to impact and scratches.

ONE SEAMLESS STEEL SURFACE The waste-fitting and overflow are moulded on the sink. The product is therefore made out of one seamless steel surface, without gaps or interstices. A great plus in terms of hygiene.

Perimetral overflow The overflow is always a security on the Foster sinks that prevents the overflow of water in case of oversights. The perimeter drain solution improves aesthetics thanks to its square and essential shape.

Small radius Bowls with squared shapes with a modern design and an increased capacity, for a minimal aesthetics connected with an extreme practicality.

Deep bowls This bowls reach an important depth, over 20 cm, thanks to the advanced production technology, that can be offer great capiciency and practicality in all the washing operations.

High thickness

1mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.

Space waste fitting

The elegant SPACE steel cap closes the drain and leaves no visible residues collected in the basket below. Space also has a small footprint and allows the optimal use of the under-sink compartment.

Save space system

Drain and siphon are designed to leave as much space as possible in the under-sink area, more and more useful today for theseparate waste collection systems.
