Cooking chamber finish	Easy Clean enamel
Lighting	Independent oven's light
Number of door glasses	3 glasses
Programming	End of cooking timer
Type of cooling	Tangential ventilation
Oven type	Ventilated gas oven
Type of commands	Knobs
Volume	91 Lt

FEATURES

A energy class	A range totally in Class A ++, A + and A. An important result that proves the high quality, aimed at optimizing performance and savings.
XXL capacity	The cooking chamber has a volume of over 70 liters, much greater than that of standard ovens.
Anti-touch finish	The steel parts of the door, thanks to the special protection, are perfectly smooth and protected from fingerprints, while maintaining the elegance of the satin finish.

Easy clean enamelling

The Easy-Clean enamelling makes the internal oven surfaces and accessories non-adhesive, while the limited porosity ensures durability and easy cleaning.

Tangential fan

A special ventilation creates a flow of air between the cooking chamber and framework, thereby reducing the temperature of the external surfaces. As consequence, the oven does not expose furniture to temperature shock.
