

Cooker hob FL

Gas hobs

Code: 7206 032

DETAILS

Edge/Installation Type	Flush-mount Top-mount
------------------------	-------------------------

Finish	Foster brushed
--------	----------------

Material	AISI 304 stainless steel
----------	--------------------------

Texture	Brushed in line
---------	-----------------

Supply	220-240 V; 50/60 Hz
--------	---------------------

Dimensions	873x513 mm
------------	------------

Base size	90cm
-----------	------

Heating element	Five burners
-----------------	--------------

Built-in hole	View technical data sheet
---------------	---

Grids	Cast iron grids and enamelled burner covers
-------	---

Width	87 cm
-------	-------

Total power	10.500 W
-------------	----------

Auxiliary	2x1.000 W
-----------	-----------

Semirapid	2x1.750 W
-----------	-----------

Dual	5.000 W
------	---------

Safety	Safety valve with quick-acting thermocouple
--------	---

Ignition	Electric ignition under knob
----------	------------------------------

Gas type	Tested for installation with natural gas, LPG nozzle set included.
----------	--

Type	Gas Hob
------	---------

EQUIPMENT

1 x Cast iron wok support 9601 727

FEATURES

Under-knob ignition	The utmost freedom of movement with electronic under-knob ignition, a common feature of all models that allows a one-hand ignition of the burner.
---------------------	---

Aeo burners

The AEO burners guarantee up to 25% energy saving compared to standard burners. All models are designed with The Dual burner with 2 independent crowns, controlled by a single knob, delivers from 1 to 5KW, a power that can only be found in professional models.

Special burners

Many Foster hobs are equipped with special burners, with two or three rings of fire that greatly increase the power delivered and the heated surface. In the DUAL models the two fire crowns also have independent ignition, making these burners perfect for both intensive and delicate cooking.

Safe cooking

All Foster cooker hobs are equipped with safety valves. They shut off the gas supply very quickly if the flame accidentally goes out.

Cast iron grids

Cast-iron is the ideal material for an hob grid, this due to the manifold properties characterising it: high heat capacity that improves cooking performance; high weight and stability that improve safety; sturdiness that preserves the hob's original aspect over time; easy cleaning.

Ultra-flat hob

Design meets functionality in the the ultra-flat models. Elegant grids that form a generously sized overall surface.
