Cooker hob S1000 Induction

Induction Hobs Code: 7373 300

DETAILS

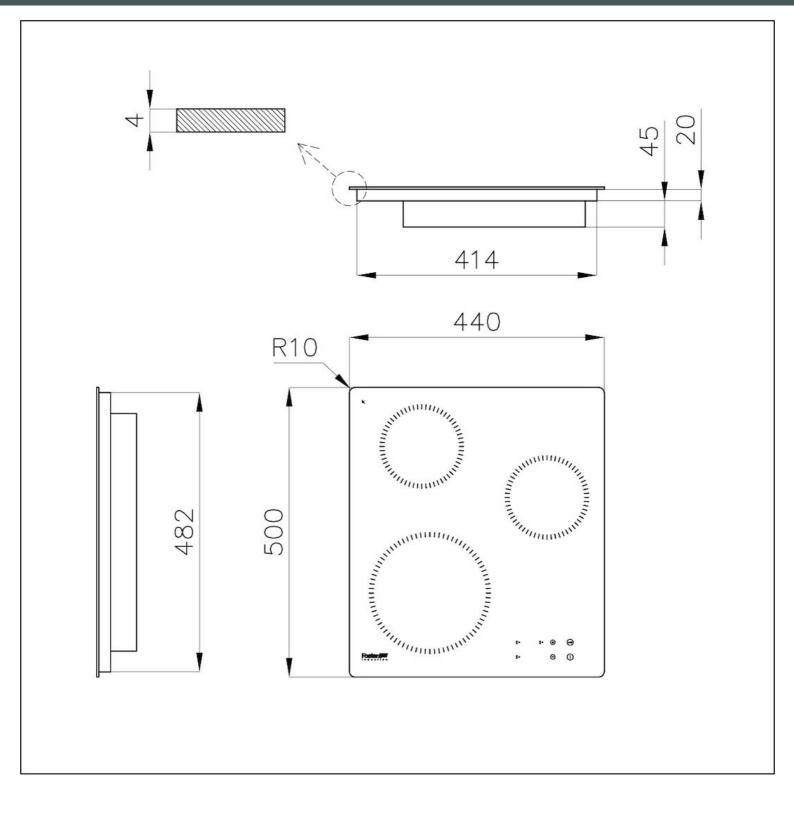

Coloring	Black
Edge/Installation Type	Vertical edge - for flush-mount or over-mount installation
Material	Ceramic glass
Dimensions	440x500 mm
Base size	45cm
Heating element	Three zones
Built-in hole	View technical data sheet
Width	44 cm
Total power	1.000 W, 1.500 W, 2.200 W, 2.800 W, 3.400 W, 5.200** W

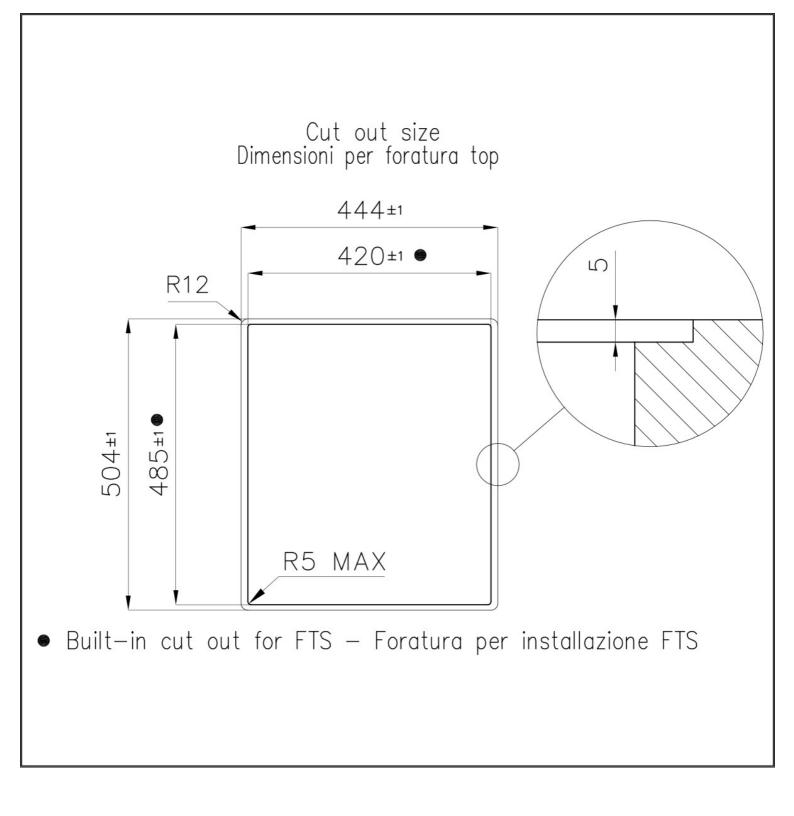

Up-left	Ø 145 mm-1.200 (1.600)* W
Down	Ø 210 mm-1.500 (2.000)* W
Right	Ø 145 mm-1.200 (1.600)* W
Power settings	9 power settings per zone + Powerboost
Safety	Safety equipment
Туре	Induction Hob
Type of commands	Touch Control
FEATURES	
Powerboost	Booster function provides increased power to the selected plate. In particular, when the Booster is activated, the plate works for ten minutes at a very high power that allows to heat quickly large quantities of water.
Pot detector	All induction cooker hobs detect the pot resting on them, but they also calculate the area they cover. This system allows the energy to be used even more efficiently. Moreover, the plates switch off automatically when the pot is removed.
End-of-cooking programming	All operations are programmed by means of the touch-control on the glass itself. Each cooking plate is capable of independent programming, and thus the possibility to set different cooking times.
Smart fan system	Correct ventilation is essential for the induction hob to function in the best possible way. The Foster system automatically regulates the amount of ventilation to suit the temperatures reached.

SafetyAll electric cooker hobs feature the most modern and sophisticated safety protections:
Centralised power-off function; Child-proof safety lock; Residual heat warning lights. Induction
models feature the following functions: Safety System that turn off the hob in the absence of
the pot; Overflow detector that automatically turns off the plate in case of liquid overflow;
Automatic deactivation to prevent accidents caused by forgetfulness.Power control functionPowerControl function allows the use of induction technology also in case of household
maximum power as low as 3 kW. The maximum power can indeed be self-limited to the
desired level to a minimum of 2.8 kW. Once the maximum power is set, we can forget about
the absorbed energy because Foster induction hob will give us a warning about possible
limitations, allowing to choose how to allocate the available energy. The hob can be easily

reprogrammed at any time to modify or remove the power limit.
