

## Sink GK

Kitchen Sinks

Code: 1403 000

### DETAILS

|                        |                                                                 |
|------------------------|-----------------------------------------------------------------|
| Edge/Installation Type | Flush-mount   Top-mount                                         |
| Finish                 | Foster brushed                                                  |
| Material               | AISI 304 stainless steel                                        |
| Texture                | Brushed in line                                                 |
| Base                   | 60 cm                                                           |
| Dimensions             | 580x480 mm                                                      |
| Standard fittings      | Fixing hooks, gasket, drain, overflow and siphon, boxed packing |
| Mixer holes            | 2 standard holes                                                |
| Built-in hole          | View technical data sheet                                       |

|                 |                                    |
|-----------------|------------------------------------|
| Drainer         | No                                 |
| Width           | 58 cm                              |
| Bowl dimension  | 450x400mm                          |
| Number of bowls | 1 bowl                             |
| Waste fitting   | Drain with automatic control SPACE |

## FEATURES

|                         |                                                                                                                                                                                                                                                                  |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Automatic waste fitting | The waste-fitting with round remote knob is supplied; a practical accessory which makes it unnecessary to get wet in order to drain the water from the bowl.                                                                                                     |
| Diamond-shape bottom    | The draining of water is an important feature in a sink, and it's always taken good care of in Foster products. In the bent-welded sinks, which would have a flat bottom, the proper draining is guaranteed by the elegant beveling, which helps the water flow. |
| Double mixer hole       | The large tap counter is already fitted with a series of 2 tap holes. In the second hole it is possible to install the remote control of the automatic drain or, alternatively, a practical soap dispenser.                                                      |
| High thickness          | 1mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.                                                                                                                                                                |
| Inclined recess         | A deep and inclined recess houses the burners and grigs, allowing to create a single work surface. The inclination also makes it extremely easy to clean the edges.                                                                                              |
| Perimetral overflow     | The overflow is always a security on the Foster sinks that prevents the overflow of water in case of oversights. The perimeter drain solution improves aesthetics thanks to its square and essential shape.                                                      |
| Save space system       | Drain and siphon are designed to leave as much space as possible in the under-sink area, more and more useful today for theseparate waste collection systems.                                                                                                    |

## Space waste fitting

The elegant SPACE steel cap closes the drain and leaves no visible residues collected in the basket below. Space also has a small footprint and allows the optimal use of the under-sink compartment.

## Squared bowls - 0/9 radius

The square bowls of Foster have perfectly squared vertical edges, while those on the bottom have a small radius of 9 mm that facilitates cleaning operations.
