The result is a unique and refined aesthetic effect, and an improvement of the mechanical properties of the steel which is more resistant to impact and scratches.

High thickness 1mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.

Perimetral overflow The overflow is always a security on the Foster sinks that prevents the overflow of water in case of oversights. The perimeter drain solution improves aesthetics thanks to its square and essential shape.

Small radius Bowls with squared shapes with a modern design and an increased capacity, for a minimal aesthetics connected with an extreme practicality.
