

Hood New Sky 100 inox

Hoods

Code: 2522 100

DETAILS

Material Stainless steel

Texture Brushed in line

Energy class A+

Ceiling – false ceiling distance min 200 mm / max 280 mm

Full description New Sky 100 stainless - Ceiling suction hood

Grease filters 2 grease filters

Operation Suction hood (filtering modality not available)

Cut out

Air exhaust hole 230x80 mm

Motors Brushless

Air flow rate 930mc/h

Motor power 85W

Hood type Ceiling suction hood

Type of commands Remote control

Suction speed 4 operating speeds

Notes: Fume exhaust ducts must have an internal diameter not lower than 120 mm

FEATURES

360° swiveling motor Swiveling motors are flexible systems that allow an easy installation, in any situation.

Auto delayed shutdown All the models with electronic interface can be programmed to turn off the suction at a postponed moment, so as to prolong the aeration of the room even after the cooking has been completed.

Brushless motor State-of-the-art Brushless motors allow high air flow rates while maintaining a low energy consumption. Furthermore, they have an almost never-ending duration.

Perimetric aspiration The perimeter suction is a feature common to many Foster hoods. The filters are hidden by steel- or crystal plates and the suction occurs along their perimeter. This has aesthetic advantages but also functional ones: the cleaning is easier, the suction power and noise-level are improved. The depression which occurs in the perimeter area facilitates in fact the suction of the particles composing the fumes.

Remote control The ceiling suction systems and the Maya hoods are equipped with a remote control to easily activate all their functions from any position.
