## FEATURES

**Gun Metal** The Gun Metal finish is obtained by treating steel with a physical process called PVD (Physical Vacuum Deposition) which deposits particles of noble metals on the surface. The result is a unique and refined aesthetic effect, and an improvement of the mechanical properties of the steel which is more resistant to impact and scratches.

---

**VINTAGE PVD** The prestigious PVD finish combines with the care for detail of the Vintage finish, to create a combination of unique elegance.

---

**PHANTOM EDGE** The Phantom Edge bowls are specifically manufactured for zero-edge installation. They are equipped with a perimetric fixing system onto which the worktop is lodged. The standard version is meant for 12mm-thick worktops.

---

**High thickness** 1mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.

---

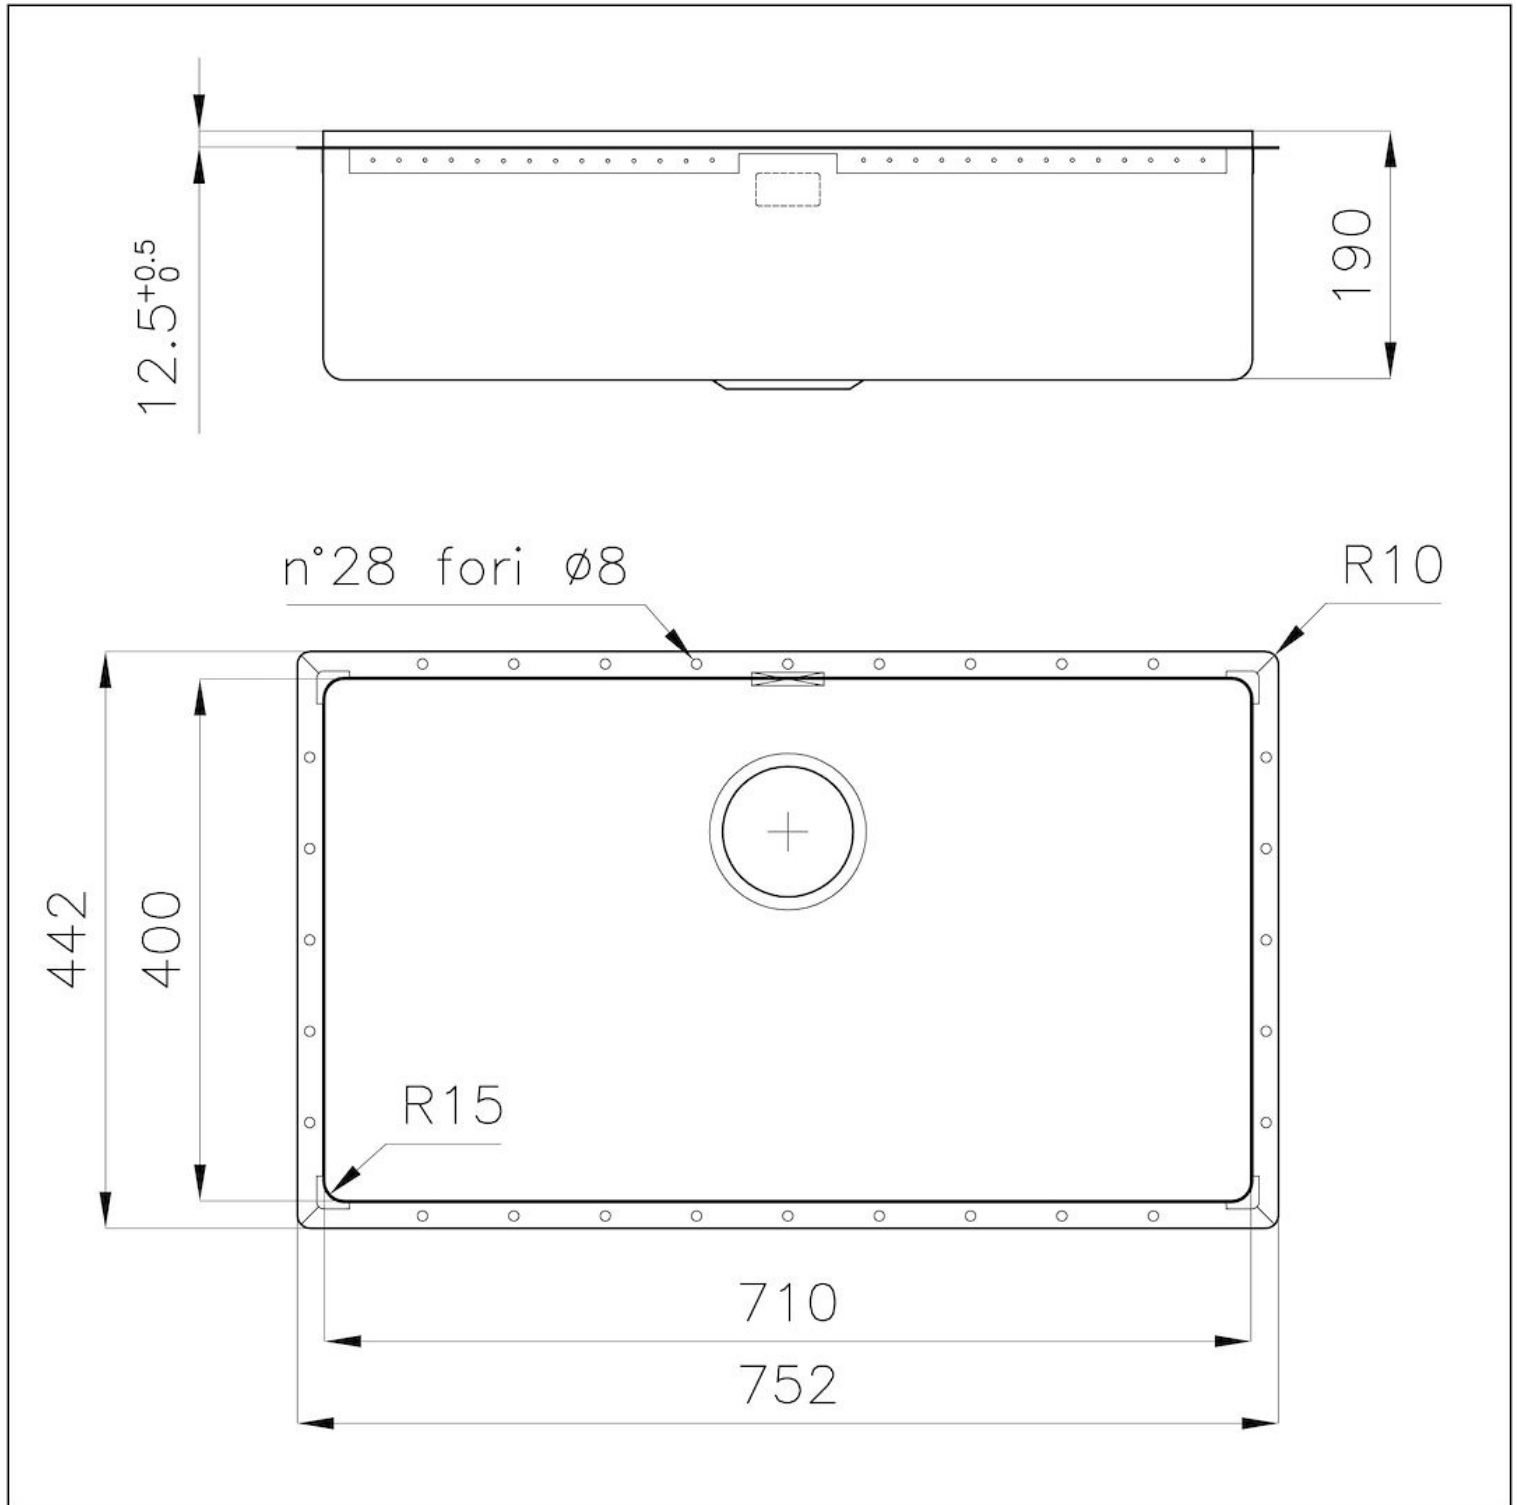

**Small radius** Bowls with squared shapes with a modern design and an increased capacity, for a minimal aesthetics connected with an extreme practicality.

---

**Perimetral overflow** The overflow is always a security on the Foster sinks that prevents the overflow of water in case of oversights. The perimeter drain solution improves aesthetics thanks to its square and essential shape.
