

## Sink Phantom Base Copper

Recommended for 12 mm thickness

Kitchen Sinks

Code: 5554 348

### DETAILS

|                   |                                                                                                          |
|-------------------|----------------------------------------------------------------------------------------------------------|
| Material          | AISI 304 stainless steel                                                                                 |
| Texture           | Foster brushed                                                                                           |
| Finish            | PVD                                                                                                      |
| Coloring          | Copper                                                                                                   |
| Dimensions        | 430 x 430 mm                                                                                             |
| Number of bowls   | 1 bowl                                                                                                   |
| Bowl dimension    | 406 x 406 mm                                                                                             |
| Built-in hole     | <a href="#">View technical data sheet</a>                                                                |
| Standard fittings | Drain, Foster overflow and universal corrugated pipe (for installing different overflows), Boxed packing |

Waste fitting

3,5" drain

Notes:

For 12 mm thick sheets

## FEATURES

Copper

The Copper finish is obtained by treating steel with a physical process called PVD (Physical Vacuum Deposition) which deposits particles of noble metals on the surface. The result is a unique and refined aesthetic effect, and an improvement of the mechanical properties of the steel which is more resistant to impact and scratches.

PHANTOM BASE - 12 mm

The Phantom BASE sink's bottoms are specifically engineered to be coupled with sinks made out of slabs. The perimetric trough makes for a simple and perfect installation. This version of Phantom BASE is meant for slabs of 12mm thickness.

PHANTOM BASE WITHOUT WELDING

The steel bottom Phantom BASE solves the problem of water draining of slab sinks, because the slope built into the moulded bottom ensures perfect draining. The radius and sloped profile of Phantom BASE guarantee great practicality and hygiene in everyday cleaning.

High thickness

1mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.

Perimetral overflow

The overflow is always a security on the Foster sinks that prevents the overflow of water in case of oversights. The perimeter drain solution improves aesthetics thanks to its square and essential shape.
